**Kidvive Fun & Learn Activity School** is an online learning platform designed for children aged 2 to 6 years. Our school offers a carefully structured curriculum across four levels: ECD (2-3 years), Play (3-4 years), Nursery (4-5 years), and KG (5-6 years), focusing on the developmental needs of young learners. Each level is designed to provide children with a strong foundation in key academic areas while making learning engaging and enjoyable. In the ECD level, we emphasize parental involvement, guiding parents on how to teach their children essential skills in motor development, communication, and early cognitive abilities. The goal is to create a strong foundation at home that supports children's early learning.

At the Play level, children begin learning alphabets, words, tracing, and rhymes while also exploring basic math and science concepts. The curriculum is designed to keep children engaged and curious, offering subjects like Bangla, English, Math, Storybooks, and Coloring, all taught in a fun and interactive way.

The Nursery level builds on these skills by introducing sentence formation, expanding vocabulary, and diving deeper into intermediate science concepts. Children are also encouraged to develop their critical thinking and problem-solving abilities through subjects like Bangla, English, Math, and Storybooks.

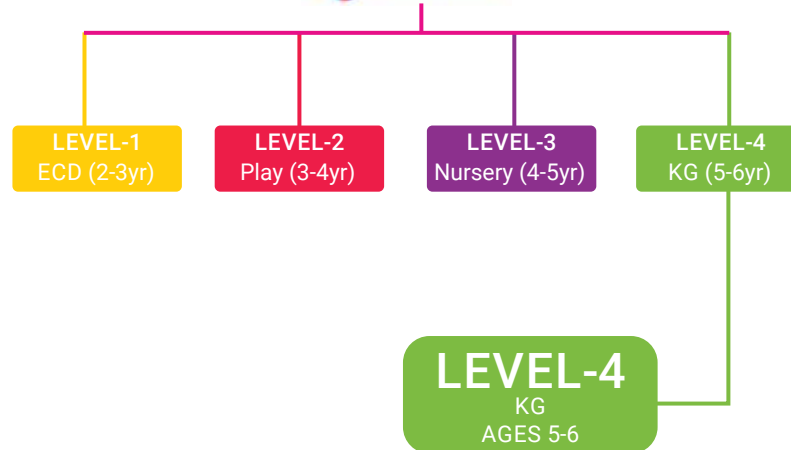

In the KG level, children refine their sentence-making, continue learning math and science, and work on writing skills with fill-in-the-blank rhymes. This level focuses on preparing children for formal schooling, giving them the necessary tools to succeed in a school environment.

At Kidvive Fun & Learn Activity School, we combine interactive learning and engaging activities with a focus on parental involvement, ensuring that children receive a well-rounded education. Our goal is to make learning enjoyable while providing children with the skills they need for future academic success.

Fun, Learn & Grow

The KG level is the final stage before kids transition to school. Children develop sentence-making skills, complete fill-in-the-blank rhymes, and enhance their understanding of science. They continue learning Bangla, English, Math, Storybooks, and Coloring Books. By the end of this level, they are fully prepared to move on to formal schooling with confidence.

## About Our Program

### KG (Kindergarten) Ages 5-6

The KG level is the final preparatory stage before children transition to formal schooling. At this level, kids focus on developing structured language skills, sentence-making, and fill-in-the-blank exercises with rhymes, ensuring they can form complete thoughts and communicate effectively. This stage also strengthens scientific thinking by allowing children to explore basic physics, biology, and earth sciences. Interactive experiments and hands-on learning help children connect concepts to real-life experiences, preparing them for a more structured school curriculum. Math lessons include addition, subtraction, and logical problem-solving, helping children develop early reasoning skills. Science becomes more engaging through fun experiments and practical activities, making learning an interactive experience. Storybooks improve reading comprehension and storytelling abilities, while detailed coloring and drawing activities enhance creativity. By the end of the KG level, children are fully equipped with the language, math, science, and cognitive skills needed to transition into a formal school environment. They will have developed strong communication skills, problem-solving abilities, and creative thinking, ensuring they are ready for the next step in their educational journey.

সোনা নয় রূপা নয়  
দিলাম মোতির মালা  
তাই তো ছোটন ঘুমিয়ে আছে  
ঘর করে উজালা।

## Pussy cat

Pussy cat, pussy cat, where have you been?  
I've been down to London to visit the Queen.

Pussy cat, pussy cat, what did you there?  
I frightened a little mouse under her chair.
